Thanks for using TACTV internet services.

Now, each time you open the browser to access internet from your PC/Laptop, you are asked to authenticate by giving your, Name and Password .There is another method of connecting to internet which is called dial up connection . In this method, there is a facility to save your User ID and password to avoid entity of user name and password every time you log into internet .For this method of connection , we have also not given session time out of 30 minutes so that your PC can stay connected .

Pease find attached step by step method to configure dial up connection .Those who are interested to switch over to this type of connection ,please follow the procedure given in the write up .If you face any difficulty , kindly contact our helpdesk toll-free no 18004252911.

Steps for dialing PPPOE

• Follow these steps for broadband dialup connection

Step-1:-

• Click the network and sharing icon in the right side of the screen as shown.

Step-2

• Then click, open network and sharing centre as shown in the above image

A new page will open for setting up a new connetion
